

CTU 4.1 Federal Asset Skimming Group

Deepwater Horizon Response

Snapshot: 5/18/2010

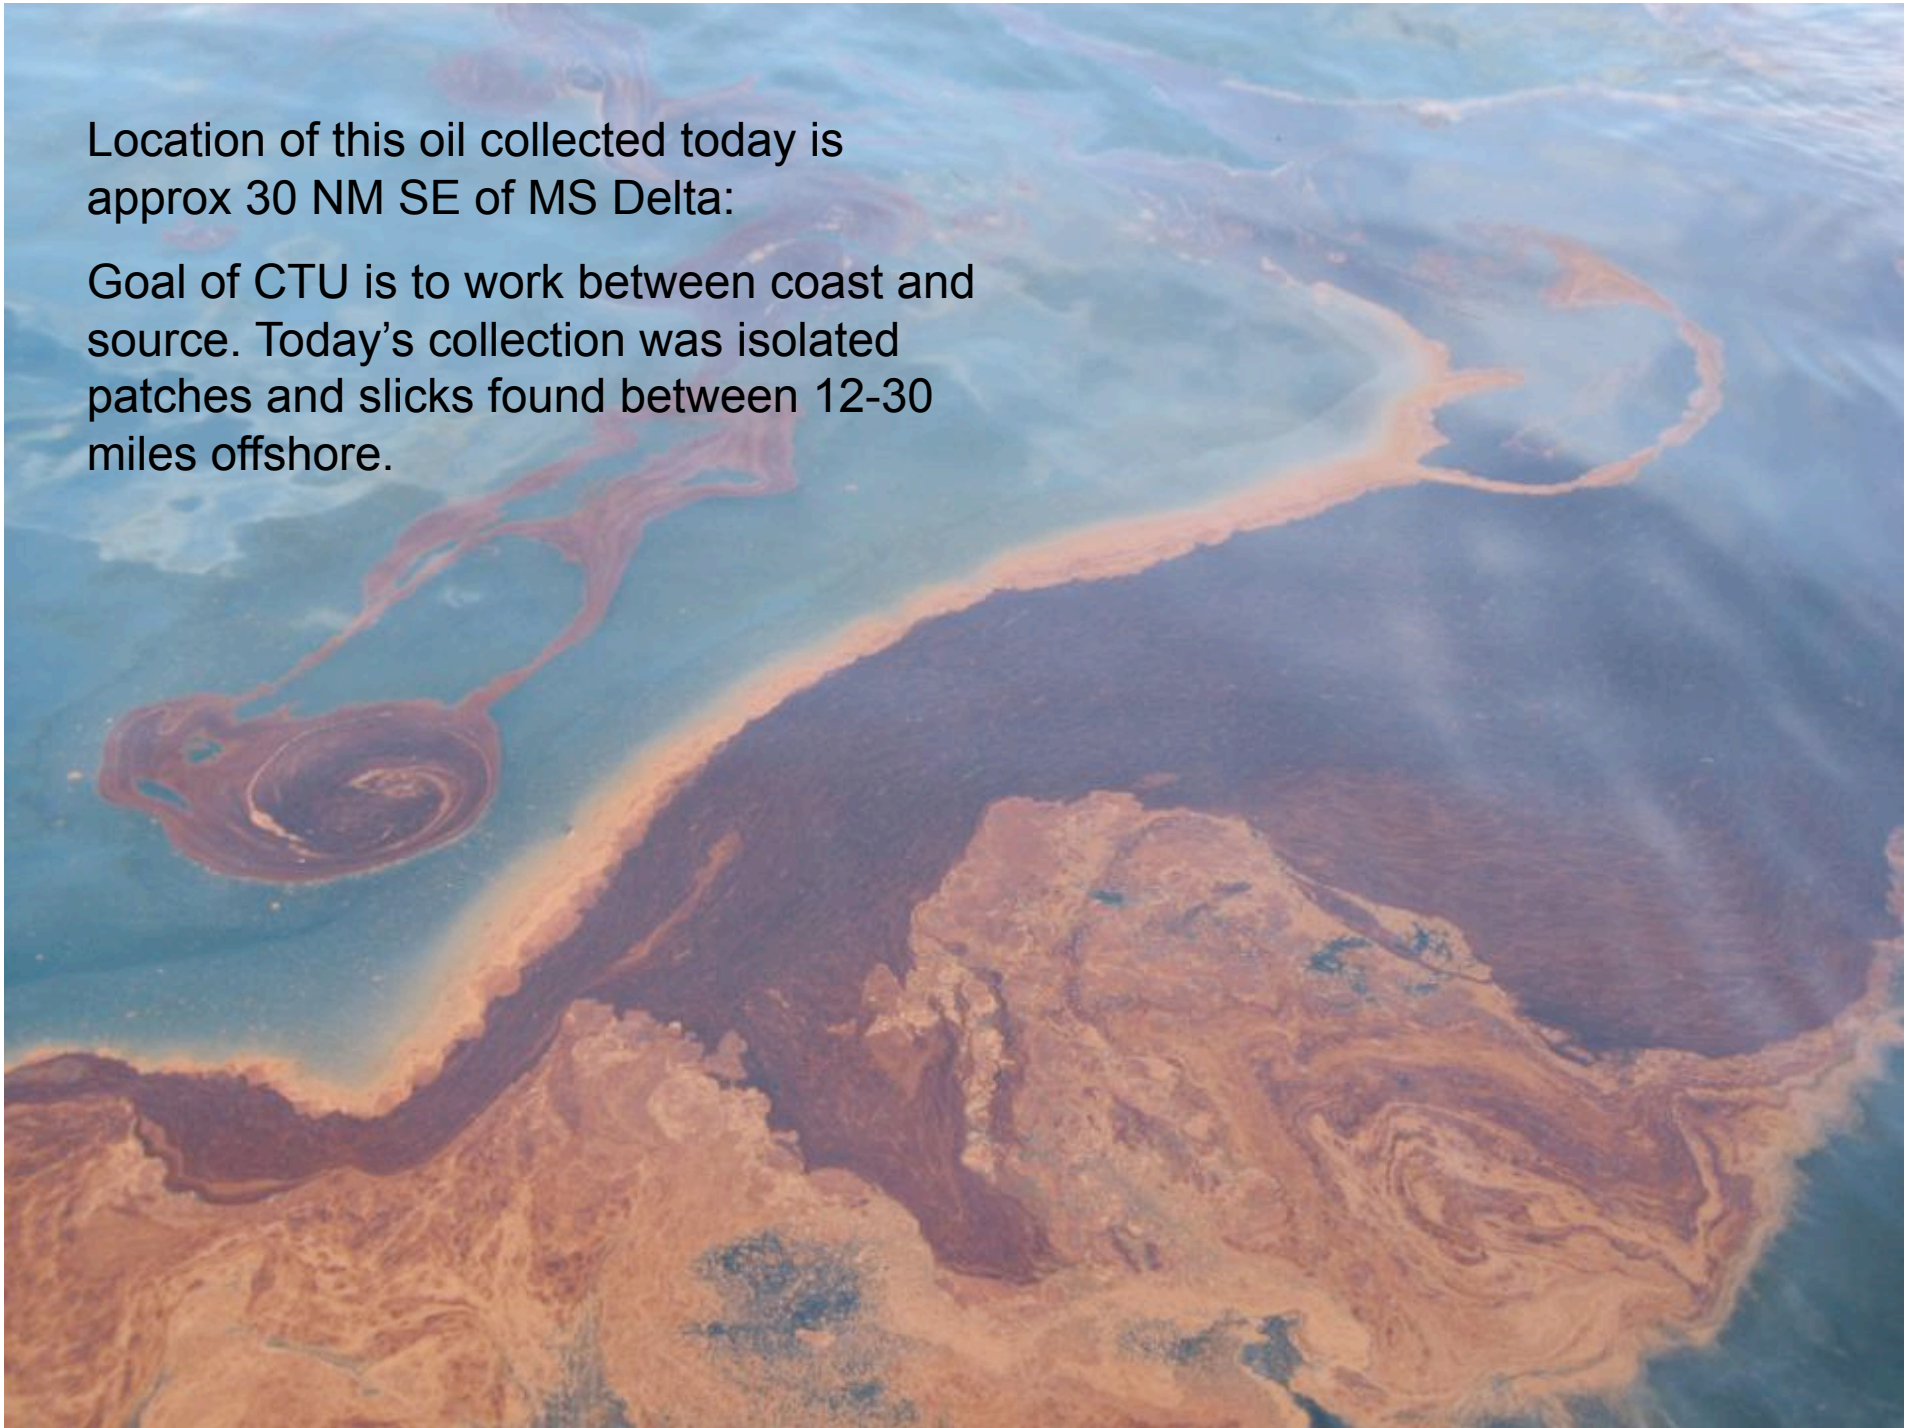

CGC OAK, CGC ELM, CGC HARRY CLAIBORNE +
3 Civilian VsIs w/ VOSS (embarked CG) + 3 Support
VsIs and Oil Barge

120,000 gals collected today by CTU 4.1

Location of this oil collected today is approx 30 NM SE of MS Delta:

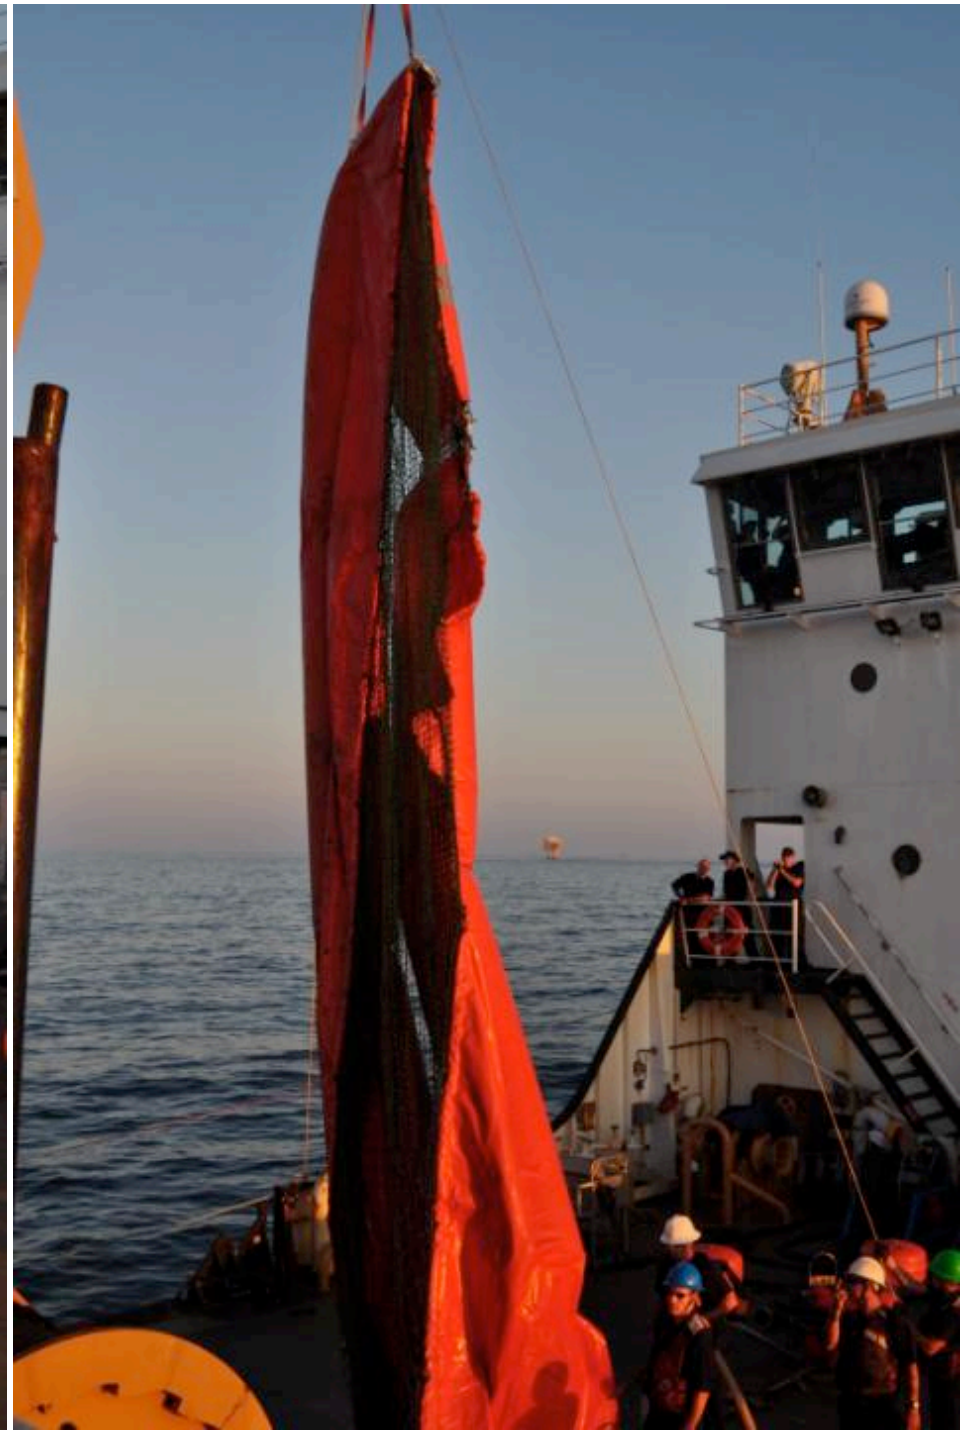

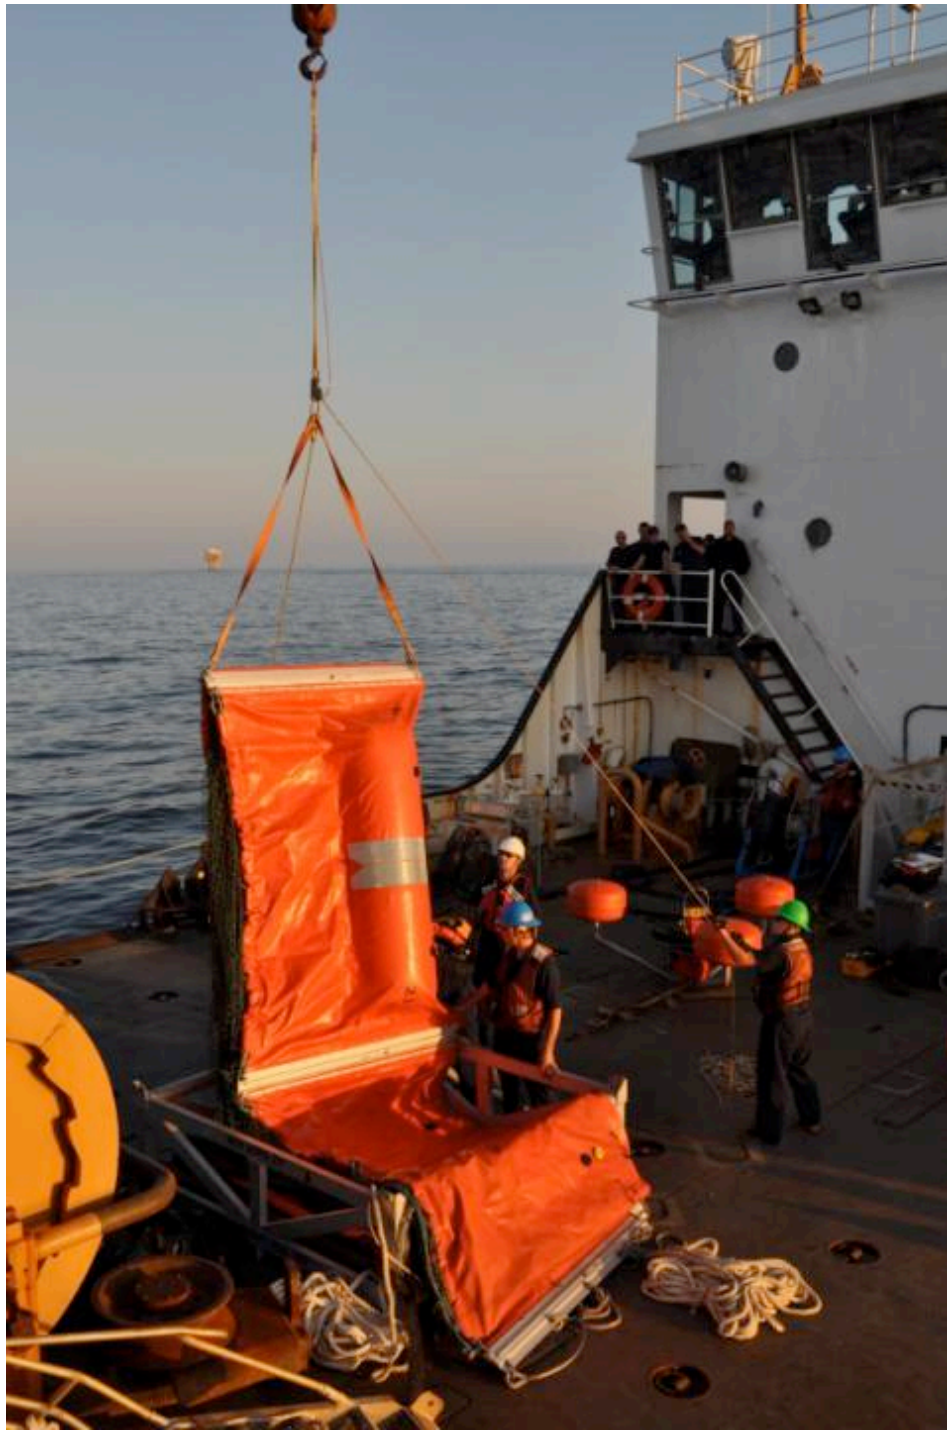

Goal of CTU is to work between coast and source. Today's collection was isolated patches and slicks found between 12-30 miles offshore.

Inflating the fast sweep boom of the
(Spilled Oil Recovery System – SORS)

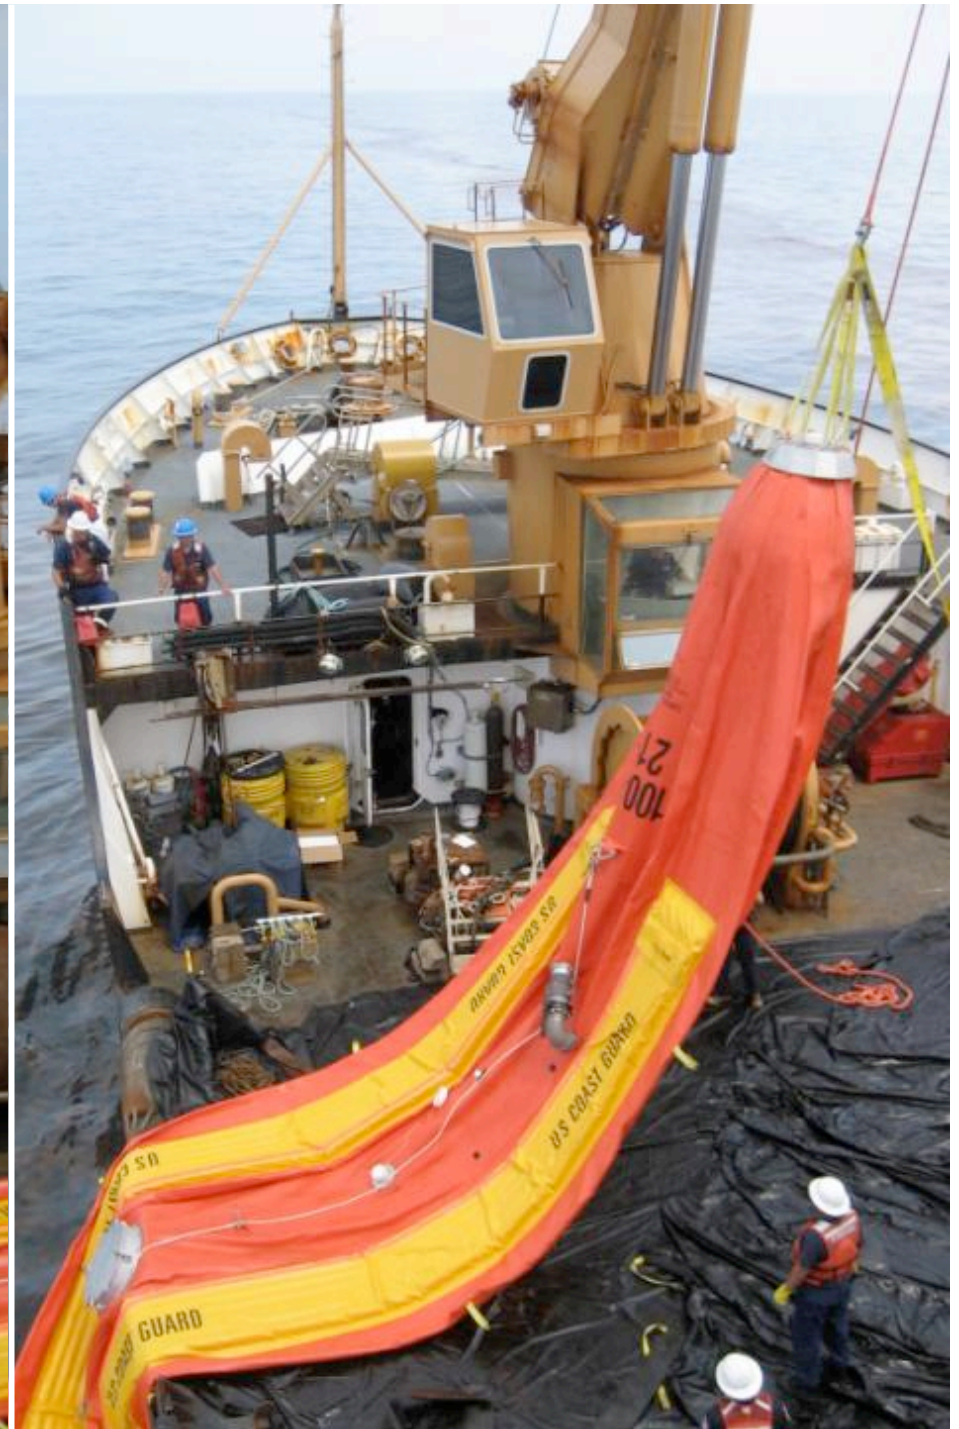

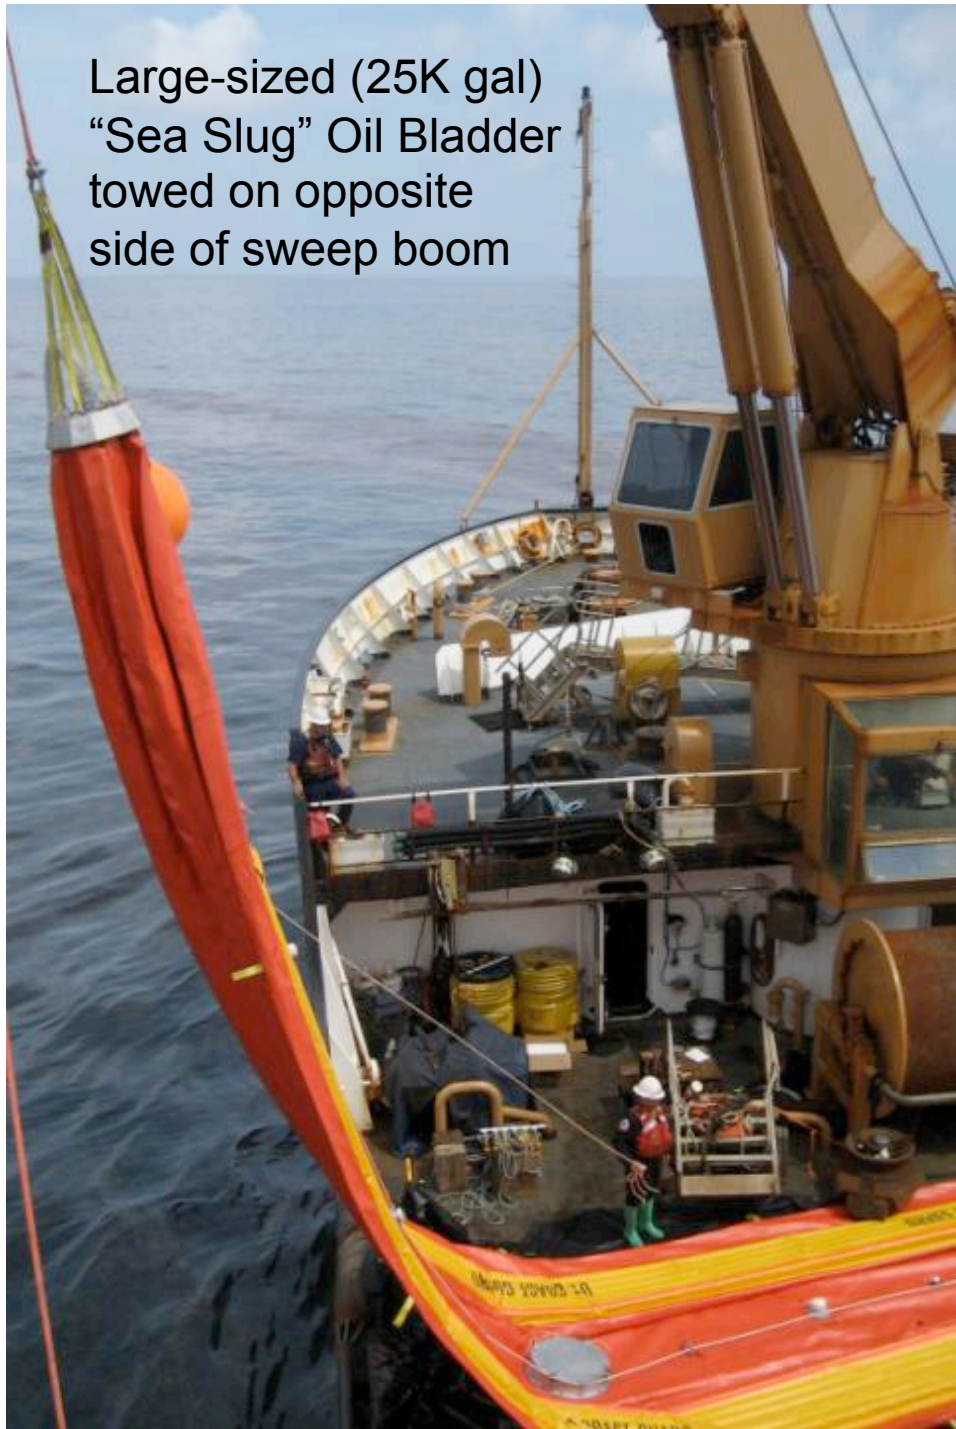

Deploying the Skimmer from a
WLB

(Boom outrigger pictured in
background.)

Large-sized (25K gal)
“Sea Slug” Oil Bladder
towed on opposite
side of sweep boom

Skimmer Operator

MKC Jesse Carns
Atlantic Strike Team

Discharge hose runs
between skimmer and
Sea Slug

Thick ribbons of oil coinciding
with the tide line.

Skimmer

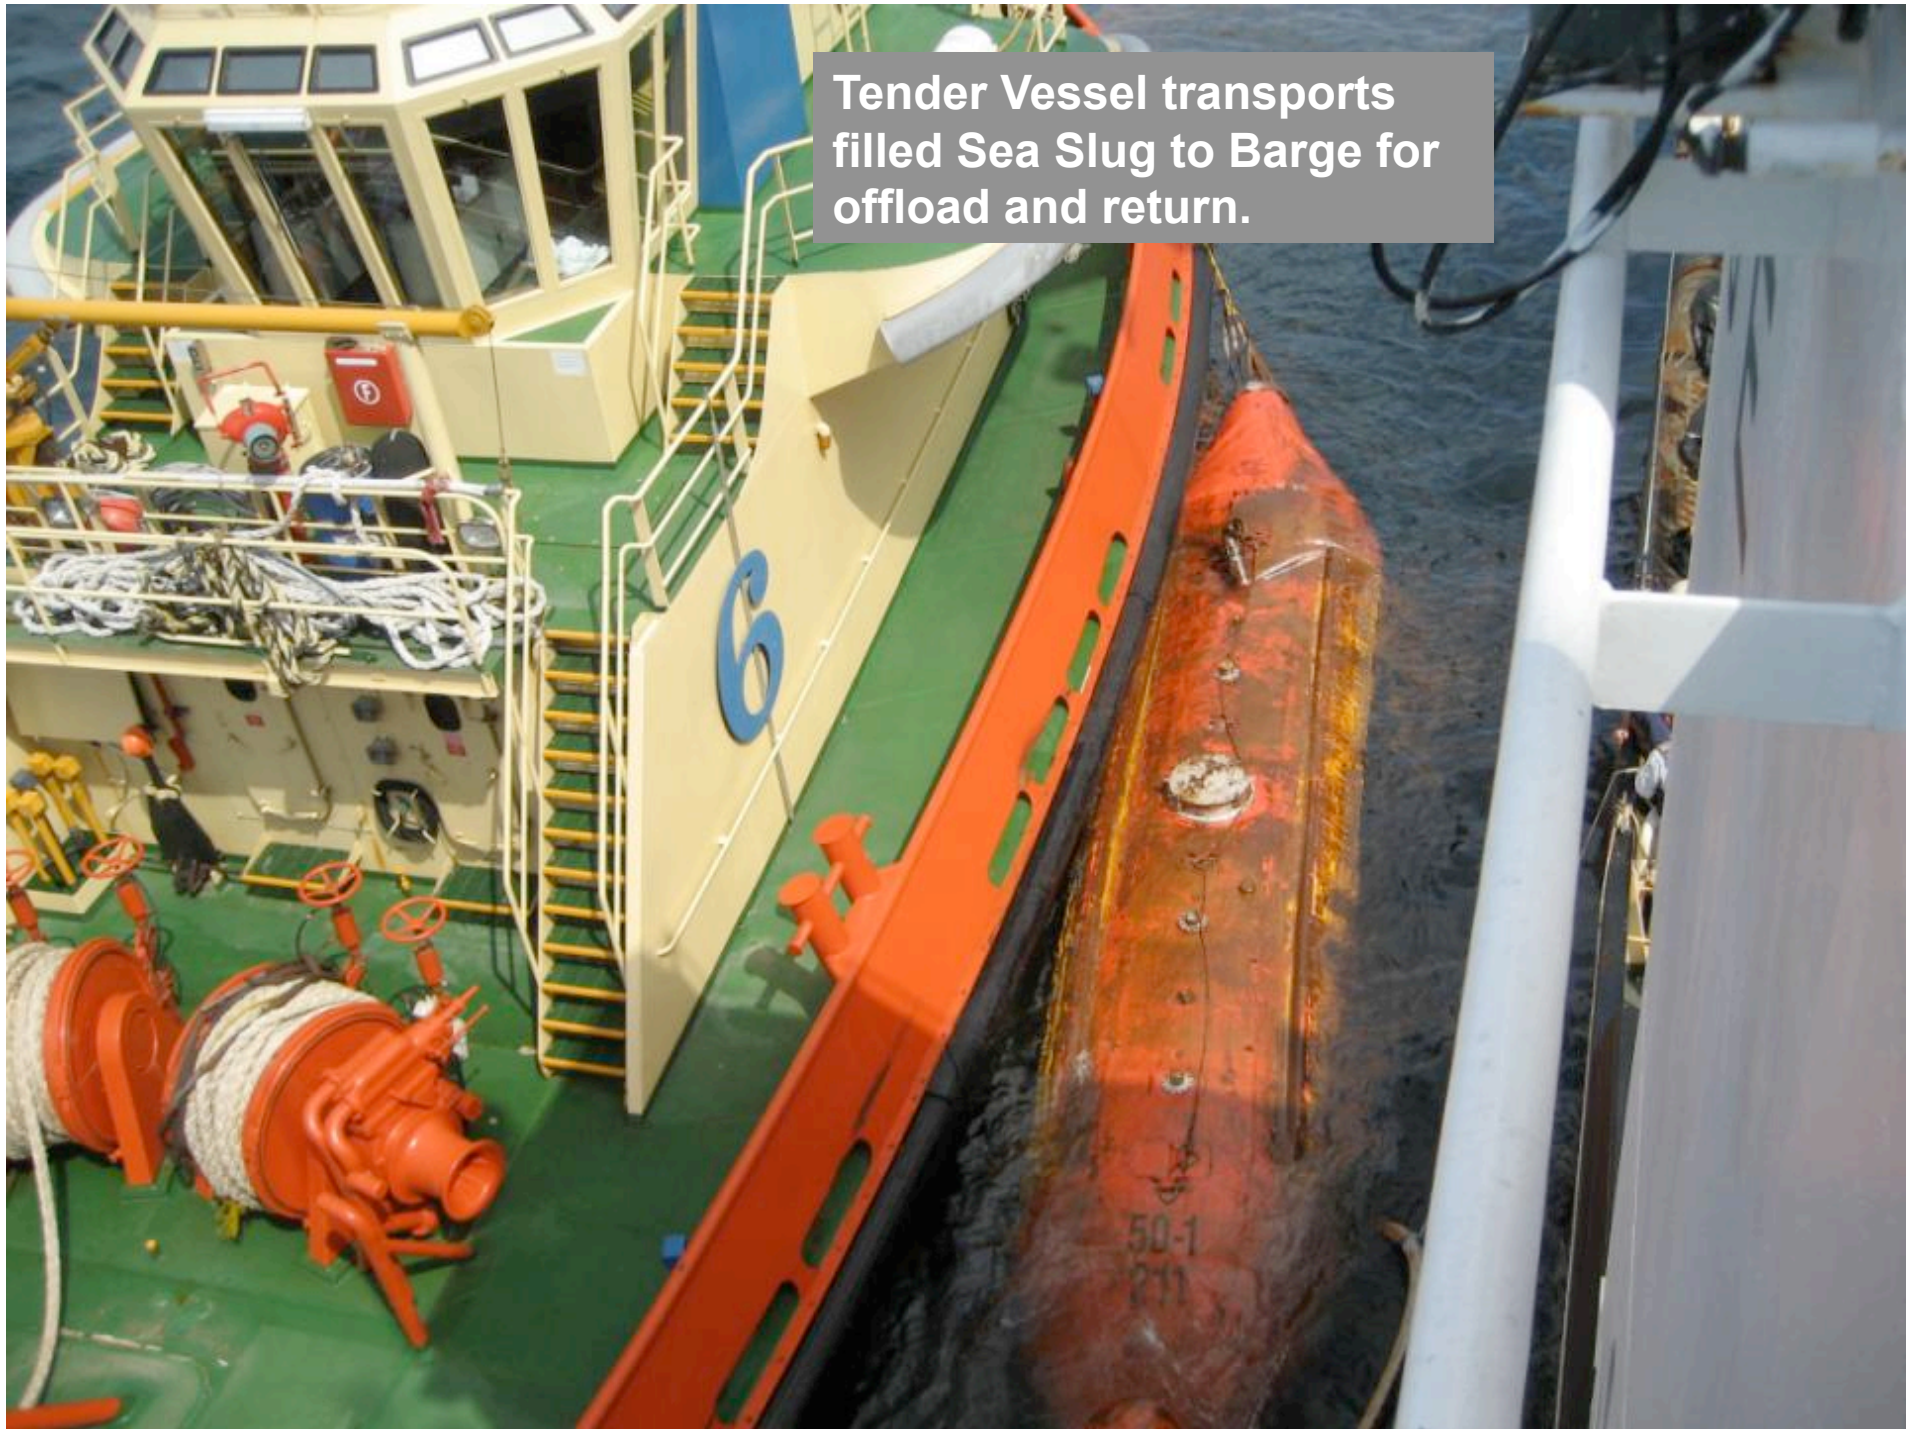

Skimmer is being operated at full power in this photo: 440 gpm. (Notice the twigs and debris.)

Disconnecting the Sea Slug from the discharge hose. (Person on the Slug is being tended by shipmate.)

Tender Vessel transports
filled Sea Slug to Barge for
offload and return.

New Slug being deployed.
